**MATHEMATICS 201-103-RE**

**FALL SEMESTER 2007**

Calculus I Commerce Studies

Instructor: Dr. Ming Mei  
Office: E -219  
Telephone: (450) 672 - 7360 ext. 281  
Email: [mmei@champlaincollege.qc.ca](mailto:mmei@champlaincollege.qc.ca) or [mei@math.mcgill.ca](mailto:mei@math.mcgill.ca)  
Website: <http://www.math.mcgill.ca/~mei>  
Office Hours: Thursday 14:00-15:30, Friday 14:00-15:30

**Prerequisite:** Secondary V Mathematics 536 (or equivalent)

**Textbook:** **Applied Calculus** for the managerial, life, and social sciences, 7<sup>th</sup> edition, by S. T. Tan, Thomson Brooks/Cole, 2007

**General objective:** In Calculus I, students will learn to apply the methods of differential Calculus to the study of function models in the field of Social Science.

**Outline:**

The course will cover the following material:

Functions Review:	Chapter 1, sections 1, 2, 3, 4
Limits, Derivatives:	Chapter 2, sections 1, 2, 3, 4, 5, 6
Differentiation:	Chapter 3, sections 1, 2, 3, 4, 5, 6
Applications:	Chapter 4, sections 1, 2, 3, 4, 5
Exponential & Logarithmic Functions:	Chapter 5, sections 1, 2, 3, 4, 5

**Teaching methods:** Class time will be devoted to lectures and problem solving. During problem solving sessions, students are encouraged to work in groups. Problems taken from the book will be suggested after each session. They indicate the level of difficulty of the problems that the students are expected to solve. The book will be followed closely and it is absolutely essential that each student has a copy and brings it to every problem solving session. Additional exercises will be provided by the instructor.

**Evaluation:**

There will be a quiz every week. The lowest mark of all quizzes will not be counted. There will be four term tests. The exact dates will be announced at least one week prior to the tests. Attendance is required for all term tests and quizzes. No possibility of making up test or quiz exists unless a written medical notice is presented immediately after student's recovery.

**Assessment plan:**

Quizzes	15%	Tests	85%
---------	-----	-------	-----

Each term test is worth 20%, and the final test is worth 25%.

**Suggested Problems**

Home work questions will be given weekly, which help students to understand better what they learn in class. So, students are strongly recommended to do the suggested questions in time. But, no home work is needed to hand in.
