

4.3.2 More Exercises

Construct tableaux to show the following are valid; for extra practice, also construct derivations for each.

1. $A \vee B \rightarrow C \vdash (A \rightarrow C) \wedge (B \rightarrow C)$
2. $B \wedge C \rightarrow A, \neg A \rightarrow C, C \rightarrow B \vdash^* A$
3. $A \rightarrow B, (C \vee B) \wedge \neg B, C \rightarrow D \vdash A \vee D$
4. $A \rightarrow C \vee D, \neg B \rightarrow \neg A, C \rightarrow \neg B \vdash A \rightarrow D$
5. $(A \rightarrow B) \vee C, A \rightarrow \neg C, B \rightarrow C \vdash \neg A$
6. $(\neg A \vee B) \wedge C, \neg B \vee \neg C \vdash \neg A$
7. $P \rightarrow Q, R \rightarrow S, P \vee R \vdash Q \vee S$

Construct tableaux to show the following are not valid; in each case, give an assignment of truth values to the variables which illustrates the invalidity of the argument.

1. $\neg(P \vee Q), P \vee R, S \rightarrow P \vee U \vdash \neg S \wedge (Q \vee U)$
2. $A \rightarrow (B \rightarrow C), C \wedge D \rightarrow \neg E, \neg F \rightarrow D \wedge E \vdash \neg C \rightarrow \neg E \vee \neg F$

4.4 Answers to the exercises

Exercise 4.3.1

1. $\mathsf{F}((p \vee q) \rightarrow (q \vee p))\checkmark$ $\mathsf{T}(p \vee q)\checkmark$ $\mathsf{F}(q \vee p)\checkmark$ $\mathsf{F}(q)$ $\mathsf{F}(p)$ $\mathsf{T}(p) \quad \mathsf{T}(q)$ $\times \quad \times$	2. $\mathsf{T}(A \rightarrow B \vee C)\checkmark$ $\mathsf{F}((A \rightarrow B) \vee (A \rightarrow C))\checkmark$ $\mathsf{F}(A \rightarrow B)\checkmark$ $\mathsf{F}(A \rightarrow C)\checkmark$ $\mathsf{T}(A)$ $\mathsf{F}(B)$ $\mathsf{T}(A)$ $\mathsf{F}(C)$ $\mathsf{F}(A) \quad \mathsf{T}(B \vee C)\checkmark$ $\times \quad \mathsf{T}(B) \quad \mathsf{T}(C)$ $\times \quad \times$	$\mathsf{T}((A \rightarrow B) \vee (A \rightarrow C))\checkmark$ $\mathsf{F}(A \rightarrow (B \vee C))\checkmark$ $\mathsf{T}(A)$ $\mathsf{F}(B \vee C)\checkmark$ $\mathsf{F}(B)$ $\mathsf{F}(C)$ $\mathsf{T}(A \rightarrow B)\checkmark \quad \mathsf{T}(A \rightarrow C)\checkmark$ $\mathsf{F}(A) \quad \mathsf{T}(B) \quad \mathsf{F}(A) \quad \mathsf{T}(C)$ $\times \quad \times \quad \times \quad \times$

2.

SO: Many possibilities, essentially amounting to
 A or $B = \perp$, $C = \perp$, $E = F = \top$, and possibly $D = \top$.
